LinkedIn | GitHub | LeetCode | GeeksforGeeks | Portfolio

Summary

Final-year B.Tech CSE (AI & ML) student with a **CGPA of 8.9/10** and **550+** DSA problems solved across LeetCode and GeeksforGeeks. Built and shipped multiple full-stack and computer-vision projects end-to-end using Java, Python, C++, JavaScript, React.js, and Node.js. Brings hands-on teaching and debugging experience from a Teaching Assistant internship at Coding Ninjas, resolving **500+** student queries with a **4.9/5** rating. Strong communicator and quick learner, comfortable working independently or as part of a team.

Education

Madanapalle Institute of Technology & Science

Bachelor of Technology in Computer Science Engineering (AI and ML)

– **CGPA:** 8.9 / 10.0 (till 6th Semester); currently in final year

Madanapalle, India

2023 – 2027

Experience

Teaching Assistant Intern (Certificate)

Coding Ninjas (Sunrise Mentors Pvt. Ltd.)

Remote

Jun 2026 – Sep 2026

- Assisted students with **Data Structures & Algorithms** and problem-solving by resolving technical queries and providing step-by-step guidance in live doubt sessions.
- Debugged student code to identify logical and implementation errors, helping learners understand efficient problem-solving approaches.
- Resolved **500+** student queries on DSA and programming while maintaining an average student rating of **4.9/5**.

Technical Skills

Languages: Python, Java, C++, JavaScript

Platforms & Tools: Linux, Git, GitHub, VS Code, IntelliJ

Back-End & Databases: Node.js, REST APIs, JWT Authentication, SQL, MongoDB

Front-End: React.js, Tailwind CSS, HTML, CSS

CS Fundamentals & Libraries: OOP, Data Structures & Algorithms, Operating Systems, OpenCV, MediaPipe

Projects

Code Grind (GitHub) | *React.js, Node.js, MongoDB, JWT, OpenRouter API, Nodemailer, Tailwind CSS*

- Independently designed and built a full-stack DSA practice platform (React.js, Node.js, MongoDB) delivering **3 curated coding problems daily** across difficulty levels and languages.
- Integrated the **OpenRouter API** to auto-generate and maintain **500+ company-specific coding problems**, debugging and refining prompts to improve output quality.
- Built a **RESTful Node.js API** with JWT authentication and automated Nodemailer notifications; used Git/GitHub throughout for version control.

AI Fitness Trainer (GitHub) | *Python, OpenCV, MediaPipe*

- Built a **real-time computer vision** app in **Python** out of curiosity to understand pose-estimation, implementing joint-angle geometry to count reps with **95%+ accuracy**.
- Debugged tracking drift across lighting conditions and optimized frame-processing logic for low-latency performance on standard hardware.

DevType (Coding Speed Platform) (GitHub) | *React.js, Tailwind CSS*

- Built and shipped a typing-practice platform for developers, engineering real-time validation logic for indentation, special characters, WPM, and keystroke accuracy.
- Added live performance metrics and leaderboards based on iterative self-testing; managed the codebase independently on GitHub.

Achievements

Communication & Leadership: Led coding workshops for **50+** students; coordinated **2** college technical symposiums.

Problem Solving: Solved **550+** Data Structures and Algorithms problems across LeetCode and GeeksforGeeks.

LeetCode Badge: Earned the **365-day** coding streak badge for consistent daily problem-solving.

HackerRank: Earned **Java** and **Problem Solving** certifications, and achieved a **5 star C++** badge.

Awards: Secured **1st place** twice in university E-sports competitions, demonstrating strategy and teamwork.
